DATE: July 1, 2010

RE: Informational Update on Asbestos

This is to inform all employees and district residents that the Elmsford Union Free School District is in compliance with all rules and regulations concerning the Asbestos Hazardous Emergency Response Act (AHERA). We are also continuing to perform the required 6 month periodic survey and the 3 year re-inspections using certified personnel where required.

Asbestos abatement projects scheduled for this summer are:

1. Grady Elementary School floor tile, pipe elbows and fittings
2. Hamilton pipe elbows and fittings in two pump rooms

The district will use only certified personnel in the asbestos field to perform any work necessary in accordance with state and federal regulations.
